ND NETAND HIWARE

HIWARE, Integrated Identity and Access Management solution
actively responding to next-generation security paradigm

What is HIWARE

Privileged Access Management for System

The beginning of the system security management are 'Manage' and 'Audit'.

HIWARE Privileged Access Management for System enables the complete management and supervision of users by controlling all accesses to, and operations of the IT infrastructure operating system such as network and server, monitoring work details in realtime and saving log records.

- ENHANCED USER AUTHENTICATION
- ACCESS AUTHORITY MANAGEMENT
- SYSTEM COMMAND MANAGEMENT
- REALTIME SESSION MANAGEMENT
- LOG RECORDING / AUDIT

Identity Management for System to work

Full and complete 'integration' and 'managing automation' are needed for easier and more powerful security.

HIWARE Identity Management for System manages all user accounts scattered across systems in an integrated fashion by interworking a client's HR system. It also automates the account and password management process for work efficiency and for more complete security.

- ACCOUNT LIFE-CYCLE POLICY MANAGEMENT
- PASSWORD POLICY MANAGEMENT
- INTEGRATED ACCOUNT POLICY MANAGEMENT
- DETECTION OF RETIREE/ INACTIVE/ ILLEGAL ACCOUNTS

Benefits of HIWARE

- Netand HIWARE is an integrated Identity Management (IM) and Privileged Access Management (PAM) solution which helps you balance security and efficiency at work by managing identities and access privilege.
- HIWARE PAM for System enables the complete management and supervision of users by controlling all accesses to and operations of the IT infrastructure such as network and server, monitoring work details in realtime and saving logs.
- HIWARE IM for Active Directory is developed to make up for a human error and security loophole from manual AD account management. It automatically manages AD accounts through consistent policies and unified management cycle by linking AD, HR system and server all together.
- HIWARE PAM for Database grants modular access to information in database differentially to each user and prevents information leak through SQL audit and log records.
- Integrated Solution for:
 - PSM for System
 - PAM for Database
 - IM for System
 - IM for Database
 - IM for Active Directory

Benefits of HIWARE

Upgrade your security and work efficiency with implementing the integrated IAM solution in a single UI

HIWARE Identity management + HIWARE Access management

Integrated UI

Approval system

Policy setting

Audit report

Privilege Access Management

Identity Management

- Access control
- Command/Query control
- Result data control
- Log audit

- Life-cycle management
- Password management
- Integrated account management
- Illegal account management

 **Integrated UI**

 **Customizable functions**

 **Connectability**

 **Reinforced IAM management**

 **Monitor & Audit ready**

HIWARE IM for System and DBMS

HIWARE Identity Management of System and DBMS

HI-IM collects identities from heterogenous devices and manages the life-cycle and passwords through the policy.

Through main features can offer automatic reduce of the unnecessary time and cost-effective business environment.

Unauthorized Account Detection

HIWARE IM for Active Directory

	Main features	Account Life-cycle Management Password Management Account Policy Management Unauthorized Account Detection
	Managing diverse features on a single UI	Approval management Identity management Policy management Report
	HIWARE Diverse authentication systems	basic Two-factor external ID/PW, IP/MAC, MOBILE OTP SMS, OTP, Smart card, RADIUS etc LDAP, etc *Providing api for integration
	HIWARE Mobile Authentication Providing the solution for double authentication of smartphones that the company developed by itself	

HIWARE PAM for System and DBMS

HIWARE Privileged Access Management

HI-PAM is an access control solution which controls and manages remote access of infrastructure and operation systems such as networks and servers, controls commands by user, monitors tasks in real time and creates audit logs.

Reinforce User Authentication

2 Factor Authentication

Basic	ID/PW, IP/MAC, MOBILE OTP
Two-factor	SMS, OTP, SSO, Smart card, RADIUS, PKI, biometrics, etc.
External	LDAP, etc. *Providing api for integration

HIWARE Mobile Authentication v1.0

Clients can save the cost to establish a security solution since we provide a mobile OTP product that we developed by ourselves

- Support Android/IOS

- Support off-line environment

System Command Control

DBMS Query Control

Real-time Session Monitoring & Control

Real-time session monitoring

Event monitoring

Forcibly blocking users' session

Providing real-time dashboard

Session timeout

A lightweight DLP solution tightly integrated with employee monitoring and insider threat detection.

Key Benefits of SCOPD: Real-Time Protection and Risk Mitigation

System Block & Alerts

Immediate blocking of compromised systems and real-time alerts to security teams.

Data Loss Prevention & Classification

Prevent unauthorized sharing of sensitive information by classifying data based on its importance and ensuring proper protection.

Insider Threat Detection

Monitor user behavior to identify potential internal risks before they escalate.

Compliance

Ensure alignment with data protection regulations like GDPR to avoid penalties.

Scopd - Why

- **Scopd** is not just an DLP with UBA solution, its much more than that. Scopd can improve productivity, increase revenue, improve profits and safeguard data.
- Scopd can be used for
 - Data Leak Prevention
 - Insider Threat Management
 - Employee Monitoring
 - User Behavior Analysis
 - Finding Disloyal Employees, Getting to know in advance who wants to leave job
 - User management
 - Endpoint management
 - Most importantly Safeguard Confidential & Crucial Data

See the Unseen, Secure the Unknown

Powered by UEBA (User and Entity Behavior Analytics) — transforming behavioral insights into proactive security.

Scopd - Highlights

- **SCOPD** is a comprehensive user behavior analysis & monitoring and security solution designed to enhance business efficiency & data security through various key features:
- **Data Loss Prevention (DLP):** Offers quick start and easy configuration of leakage monitoring, including a search engine to locate files on client machines and triggers for registering DLP events.
- **Computer Monitoring:** Record screens, capture screenshots, track user activity on the internet & in applications to monitor workflow
- **Time Tracking and HR Analytics:** Enables the creation of systems for analyzing employee performance, revealing real capabilities and achieved results.
- **Remote Employee Monitoring:** Provides tools to monitor remote workers, detect security threats, and prevent data leaks, ensuring productivity and security across various work environments.
- **Biometric Authentication and Physical Security:** Features include face recognition via webcam, analysis of keyboard handwriting, and prevention of screen photos, contributing to a zero-trust security policy.
- **Analytics Report Group:** Provides comprehensive assessments of individual employees and departments' effectiveness in a 24/7 mode, facilitating informed management decisions.

These features collectively provide organizations with the tools needed to monitor employee activities, enhance productivity, and ensure data security.

SCOPD Data Loss Prevention (DLP)

Prevent Sensitive Information from Leaving Your Organization

SCOPD DLP protects business data across multiple leakage channels:

- USB & Removable Media
- Internet Uploads
- Email Attachments
- Clipboard Operations
- Printing
- Document Reading
- Voice/Speech Monitoring
- Screen OCR

Flexible Response Options

- ✓ Monitor & Audit
- ✓ Classify Sensitive Files
- ✓ Alert Security Team
- ✓ Block Unauthorized Actions

Scopd - Key DLP Capabilities

Capability	Description
Content Inspection	Detect confidential information using keywords and Regular Expressions
USB Protection	Monitor or block copying to removable media
Internet Upload Monitoring	Detect or block file uploads to websites and cloud services
Clipboard Monitoring	Detect sensitive copy/paste activities
Print Monitoring	Monitor printing of confidential documents
Password Protected Archives	Detect encrypted archives for additional control
Shadow Copy	Store copy of transferred files for forensic investigation
Document Classification	Search, discover & classify sensitive files
OCR Support	Detect text inside screenshots and images
Central Policy Management	Configure policies from a single console

Scopd - DLP Coverage Matrix

Data Leakage Channel	Monitor	Alert	Block
USB Drives	✓	✓	✓
Shared Folders	✓	✓	✓
Internet Uploads	✓	✓	✓
Email Attachments	✓	✓	✓

Scopd - Features

Scopd - DLP with Employee Monitoring

-  Employee monitoring for Windows, Mac, Linux and DLP for Windows
-  Active and non-active time tracking
-  Application, Websites, Data Transfer, web search
-  Late arrival, Early departure, overwork, underwork
-  Face recognition to find if unauthorised user working on PC
-  StopPhoto: Prevent screenshot and taking screen photo from Mobile
-  User behaviour analysis, changed behaviour, working pattern
-  Stop Data Leaks for crucial data based on type, keywords, regex
-  OCR, file hashes, data discovery, file search
-  File Audit: create, move, copy, delete
-  Live Audio, video, screen, mic monitoring
-  Risk Analysis and alerts
-  Compare employees, branches & department working pattern
-  Achieve Compliance DPDPA, RBI, SEBI, IRDA, GDPR etc
-  Realtime desktop alerts
-  Web-console: access anytime, anywhere, any device
-  Hardware & Software Inventory of all device
-  Domain Integration
-  MySQL, PostgreSQL, MS-SQL support ---More---
-  Productive and non-productive time tracking
-  Login-logout time; timesheet
-  Top performers, Top violators
-  Application & website blocking
-  Geolocation tracking to find employee location
-  Lock PC in case of unauthorised usage
-  DLP for sending, upload, copy, printing, reading
-  Email, USB drives, web uploads, printouts, messengers
-  Central messaging and lock every PC in organization
-  Screen recording
-  Insider threat investigation
-  LLM Integration
-  Export reports to HTML, PDF, xls
-  Reports on email, FTP, shared folder, web upload
-  Customised console for HOD, HR, IT, CXO
-  Silent or announced monitoring
-  Uninstall protection & alert

SOMANSA

Somansa: Privacy-i Endpoint DLP

Privacy-i and Data Security Process

❖ Privacy-i protects sensitive data at rest

- Privacy-i is designed to follow phases set out in the data protections laws

DISCOVER Sensitive Data

- Scan and Locate sensitive data (PCs, Servers, Databases)
- Encrypt or Delete Data

Strategy 1

- Define, Who, What, Where Sensitive Data Stored.
- Complete visibility of sensitive data within the organization

PREVENT Data Breach

- Prevent data breach via removable storage, printer, network services(e.g. email)

Strategy 2

- Create breach prevention policy tuned for each organization
- Monitor for policy violations, block unauthorized use of removable disk, printer, or upload on the internet

REPORT

- Real-time Alerts of incidents
- Event logs and forensic evidence

Strategy 3

- Real-time event monitoring, log analysis, user/file activity analysis help security team to detect, respond to potential breach
- Audit trail for compliance

Somansa: Mail-i Network DLP

Mail-i: E-mail & NetApps Control/Monitor

Mail-i protects sensitive data in motion

- Mail-i Logs outgoing data in a real-time (email, social media, messenger, cloud service, etc)

Mail-i data Logging & Granular Control

E-mail(SMTP, POP3, IMAP)

- E-mail data logging(real-time)
- Access, Writing, File transfer

Instant Messenger(Web, Apps)

- Support popular messengers
- Access, Writing, File transfer

Social Media

- Logs uploaded contents
- Access, Writing, File transfer

Cloud Storage

- Logs transferred data
- Control over various SaaS

SOMANSA'S STRENGTHS

Do you want to use only approved USB?

Unauthorized USB → READ (X), WRITE (X)

Authorized USB → READ (O), WRITE (O)

Must obtain approval to transfer files

Unauthorized transfer of data from desktop PC is blocked without permission / approval

Multiple products, One view

All products can be managed by one central console

Central Management

Request approval

Set Policy/
Apply

Block/Allow logs and copied files

SOMANSA

Fast Search & Report Big Data

Return search results in max. 3 minutes
(in millions of logs / more than 30 keywords)

What if there's sensitive data in the image ?

Sensitive data in image file can be detected as OCR feature (Optical Character Recognition)

Continuous Vulnerability Assessment for Modern IT & OT Environments

Why VAPT?

- Attackers only need one forgotten vulnerability, one exposed service or one leaked credential to break in. SecPoint® Penetrator™ helps you find the weak points first with scheduled vulnerability scanning, Dark Web Search, authenticated scanning, on premises deployment, local data control and technical scan profiles for NIS2, ISO, CRA, DORA, CMMC, OWASP and more. It helps support compliance work with technical checks and reports.

SecPoint[®] Penetrator[™]

Key Features

- High-speed 64-bit vulnerability scanner
- Scan Internal, External & Public IP Networks
- Automated Vulnerability Assessment
- CVE-based Risk Identification & Prioritization
- Network, Server & Endpoint Security Assessment
- Authenticated & Unauthenticated Scanning
- VMware, Hyper-V & Virtual Infrastructure Support
- Detailed Executive & Technical Reports
- Compliance Reporting (PCI DSS, ISO 27001, CIS, etc.)
- Scheduled & Continuous Security Assessments

Ideal For

- ✓ Enterprises
- ✓ Government
- ✓ Banking & Financial Services
- ✓ Nonbanking Finance Corps
- ✓ Manufacturing
- ✓ Healthcare
- ✓ Cyber Security Providers
- ✓ Security Auditors
- ✓ SMBs

SecPoint Cloud Penetrator™

External Attack Surface & Web Application Security Cloud-Based Security Testing

- Cloud (VPS) Installation or SaaS
- External Attack Surface Assessment
- Website & Web Application Vulnerability Scanning
- SQL Injection Detection
- Cross-Site Scripting (XSS) Detection
- Firewall & Internet-facing Device Assessment
- SCADA / ICS Security Scanning
- Multiple Scan Profiles for Different Environments
- Actionable Remediation Recommendations
- Executive Dashboard & Reporting

Why SecPoint?

- 150,000+ continuously updated vulnerability checks
- 34 technical scan profiles supporting NIS2, ISO 27001, PCI DSS, OWASP, NIST, DORA, CMMC, CIS, HIPAA, SCADA and more.
- Continuous vulnerability management with scheduled scanning
- Dark Web Search for leaked credentials & exposed data
- AI-assisted vulnerability detection with reduced false positives
- Compliance-ready technical scan profiles
- Privacy-first European cybersecurity solution
- Flexible deployment: On-premises, Hardware & Cloud
- MSP-ready with multi-user management & white-label reports
- Real human support from cybersecurity experts
- Trusted worldwide since 1997

Reports

Analysis of Results

A total number of **54** potential vulnerabilities were identified on the target systems, with a ratio of **24.1%** of high level vulnerabilities.

Risk Level	Vulnerability
	BEAST Vulnerable TLS 1.0 CBC Cipher Accepted - TLS_ECDHE_RSA_WITH_AES_128_CBC_SHA
	BEAST Vulnerable TLS 1.0 CBC Cipher Accepted - TLS_ECDHE_RSA_WITH_AES_256_CBC_SHA
	BEAST Vulnerable TLS 1.0 CBC Cipher Accepted - TLS_RSA_WITH_AES_128_CBC_SHA
	BEAST Vulnerable TLS 1.0 CBC Cipher Accepted - TLS_RSA_WITH_AES_256_CBC_SHA
	NetBIOS service listening 445 TCP Possible Vulnerable Remote Exploits
	Possible Wsdapi Server Heap Overflow
	TLS 1.0 Protocol Enabled
	TLS 1.1 Protocol Enabled
	VNC Service identified
	Windows Terminal Services RDP
	ctf Malware Backdoor Port Identified
	possible ctf port Malware Backdoor / Windows Services Identified
	possible ctf port Malware Backdoor Port Identified
	Deprecated TLS 1.0 Protocol Supported
	Deprecated TLS 1.1 Protocol Supported
	SSL Certificate Cannot Be Trusted (Missing Extended Key Usage) on 192.168.10.3:7070
	SSL Certificate Cannot Be Trusted (Missing Extended Key Usage) on 192.168.10.3:8391
	TLS CBC Cipher Suite With Static RSA Accepted - TLS_RSA_WITH_AES_128_CBC_SHA
	TLS CBC Cipher Suite With Static RSA Accepted - TLS_RSA_WITH_AES_128_CBC_SHA256
	TLS CBC Cipher Suite With Static RSA Accepted - TLS_RSA_WITH_AES_256_CBC_SHA

Vulnerability	BEAST Vulnerable TLS 1.0 CBC Cipher Accepted - TLS_ECDHE_RSA_WITH_AES_128_CBC_SHA
Risk Level	High
Port	8391/tcp
SecPoint ID	134376
CVE	CVE-2011-3389
CVSS	CVE-2011-3389 - CVSS Score V2: 4.3
Impact	The server accepts TLS 1.0 with a CBC-mode cipher suite. TLS 1.0 CBC cipher suites are associated with the BEAST attack because TLS 1.0 uses predictable initialization vectors for CBC mode. This finding is protocol-specific and is only reported when TLS 1.0 CBC negotiation is confirmed. Modern clients may include mitigations, but TLS 1.0 is deprecated and should be disabled for security and compliance reasons.
Mitigation	Disable TLS 1.0 and TLS 1.1. Enable TLS 1.2 and TLS 1.3 only. Prefer modern AEAD cipher suites such as AES-GCM or ChaCha20-Poly1305 and forward-secret ECDHE cipher suites for TLS 1.2.
Vulnerability Output / Evidences	
	Server 192.168.10.3:8391 accepted TLS 1.0 with CBC cipher TLS_ECDHE_RSA_WITH_AES_128_CBC_SHA
	OpenSSL cipher ECDHE-RSA-AES128-SHA
	negotiated protocol TLSv1
	negotiated cipher ECDHE-RSA-AES128-SHA

Scan Name	Endpoint_VAPT	Audited on	2026-03-07 19:36:29
Scan Profile	Best Scan		
Scan Engine	9.9.33.2905	Firmware Version	67.0.3
Audited Targets	192.168.0.122		

Overall Risk Level: Low (Secure Level). Your system security is at a very high level. No vulnerabilities were found in this test however there may be a potential risk in the future. It is recommended a scheduled scanning of your system to ensure a continuous high security level.

Compliance result:  **The Scan is Compliant**

Vulnerabilities: 2 potential vulnerabilities identified, with the following risk levels:

High: 0

Medium: 0

Low: 0

Information: 2

Emsisoft Anti-Malware

ANTIVIRUS NOT ENOUGH, YOU NEED ANTI-MALWARE

The screenshot shows the Emsisoft Anti-Malware interface on a monitor. The interface has a top navigation bar with tabs: Overview, Protection, Scan, Quarantine, Logs, and Settings. Below the navigation bar, there's a status bar that says "Your computer is protected!". The main area is divided into four large blue tiles: Protection (with a shield icon), Scan (with a magnifying glass icon), Quarantine (with a square icon containing a circle), and Logs (with a list icon). Each tile has a sub-section with details: Protection lists "SURF PROTECTION", "FILE GUARD", "BEHAVIOR BLOCKER", and "ANTI-RANSOMWARE"; Scan lists "QUICK SCAN", "MALWARE SCAN", and "CUSTOM SCAN"; Quarantine shows "9 MALICIOUS ITEMS IN QUARANTINE"; and Logs shows "15 MALWARE OBJECTS DETECTED SO FAR". Below these tiles are sections for Updates (last update 16 min ago), License (294 days left), Support (need assistance?), and Follow us (social media icons). At the bottom, there's a "SECURITY NEWS" section with an article about manual removal of unwanted programs (PUPs) and a "26 days a" indicator.

Unique: Dual-engine malware scanner

The core: 4-layer protection incl. Anti-Ransomware

Hourly updates: Against 300,000 new threats every day

Advanced: Cleaning and restoration capabilities

No bloat: Easy to navigate, lightweight to use

Extended logs to look up past actions

Security knowledge articles and outbreak alerts

Ultra-fast: Malware scans in about 1 minute only!

Outstanding: Quick and helpful customer support

Emsisoft Anti-Malware

Stops Ransomware. Before it encrypts your files.

Emsisoft's Anti-Ransomware protection layer is custom-built to detect behavioral patterns of ransomware attacks and stop them before your files can be encrypted. Other anti-ransomware solutions rely on detection of repeated encryption, so your most valuable files may already be lost before they act.

Emsisoft Anti-Malware

AWARDS & CERTIFICATIONS

Comprehensive Backup & Disaster Recovery with Vembu BDR Suite

Few of Vembu customers

100+ countries

4000+ partners

60000+ businesses

24/7 Support

VMware Backup & Replication - VMware vSphere ESXi host/vCenter Server

Hyper-V Backup - Hyper-V Standalone host, Cluster, CSV & SMB

Windows Image Backup - Windows Servers & Workstations

File & Application Backup - Files/Folders on Windows, Linux, Mac, NAS & MS- Apps

Offsite DR - Replicate a copy of your backup data to Remote/Branch Office

Hybrid Cloud - Replicate a copy of your backup data to Vembu Cloud

Office 365 Backup - Backup Office 365 mails, calendars, contacts & onedrive to Vembu Cloud

G- Suite Backup - Backup G-suite mails, calendars, contacts & drive to Vembu Cloud

BDR 360 - Centralized Monitoring Tool

Customer hosted deployment

Backup data is stored in the customer's on-premise storage.
For additional data protection, a secondary copy of backups can be replicated to:

- Customer's Offsite (Remote/Branch office)
- Service Provider's site

Recovery Time Objectives (RTO)

Vembu offers Industry best RTO which is less than 15 minutes.

Quick VM Recovery

Instant File Recovery

Failover and Failback

Explorer for Microsoft Exchange,
SharePoint, SQL and Active Directory

Automatic Backup Verification

Backup data should be recoverable. If not, it is worthless. Vembu provides the ability to run automatic backup verification for all backed up VMs and physical machines

- Backup verification can be automated to run post completion of every backup schedule or once in a day.
- In the process, booting of backed up VM or physical machine will be carried out and screenshot of boot screen will be captured. This screenshot details will be sent to administrators via email.

Efficient Storage Management

Vembu BDR Backup Server utilizes VembuHIVE™ file system to effectively manage storage repositories. VembuHIVE™ is an efficient cloud file system designed for large-scale backup and disaster recovery application with support for advanced use-cases. VembuHIVE™ can be defined as a filesystem for filesystems.

- Supports SAN, NAS and DAS
- Automatically scale up/out the storage devices
- In-built version control and error correction
- In-built Compression & Deduplication
- Encryption

Migration Plan (P2V, V2V & V2P)

Hybrid Deployment - Scenario 1 (CloudDR)

Setup DR site in your local environment and backup via LAN connections and send another copy of backup data to Vembu Cloud via WAN connection by signing up to Vembu CloudDR service

Remote office/Branch office

Setup Vembu BDR Backup Server and Vembu OffsiteDR Server in both Remote office and Branch office and sync backup data between both the locations

Acronis Backup Cloud

A powerful, hybrid cloud backup solution for service providers that protects more than 20 platforms and lets them quickly realize incremental revenues with zero upfront costs and a pay-as-you-go business model.

New Generation Data Protection for:

- Market leading Hypervisors
- Market leading Clouds
- Market leading Operating Systems
- Market leading Applications
- Office 365 Mailboxes
- Mobile workforce
- Web sites

Impero

Connect

Fast, Secure Remote Access

Impero Connect

- Impero Connect gives you flexible access across platforms, devices and network segments from a single, secure solution.
- Secure Remote Access Connect with confidence to any device, platform, or network.
- Consolidated Connectivity Across Multiple Platforms, One solution. All devices.
- Cross-platform support, including Windows, Linux, Mac and Android
- Centralized management of individual and group roles and permissions
- Secure access into complex networks – BFSI, POS, Production
- Support for embedded operating systems
- Self-hosted or cloud-based Internet connectivity through Connect's secure communication protocol
- Multiple options for multi-factor authentication, including Microsoft Azure
- Simplify maintenance and reduce network vulnerability by consolidating support with a single solution

Benefits Of Using Impero Connect

- Secure remote control, compliant with industry regulations
- Enterprise-class security architecture
- Broad platform support for end users and devices, including mobile devices and production technology
- Scalable and versatile configuration for complex environments
- Web-enabled access for vendors & mobile employees
- Secures tunneling for access between devices without the need to configure VPNs
- Professional services: expert consultants who can help companies save implementation time, reduce security risk and improve support efficiency
- Greater end-user satisfaction
- Better device uptime
